

# AllGal Garages & Carports are manufactured to suit your needs

All buildings in our range can be supplied in kit form or fully erected. The standard kit contains all components required, from the hold down bolts to the storm water capacity guttering and downpipes. Comprehensive assembly instructions as well as plans for council are included. Delivery can be arranged promptly. Keep in mind that an AllGal Garage

or Carport can be easily extended to suit your future requirements.

Consider the advantages of the steel frame that won't rot or warp, the durability of the various claddings available such as Colorbond steel from BHP, Hardiplank, or the great looks of Western red cedar, the decision is yours.

NB: Some specifications subject to minor alteration
